Cuisinart DCC-1200 Brew Central™ 12 Cup Programmable Coffeemaker - Use Manual - Use Guide PDF. Documents: Go to download! Owner's manual - (English, Spanish) Brew Central® Coffeemaker DCC-1200 Series User Manual Table Of ContentsImportant SafeguardsUnpacking InstructionsIntroductionThe Quest for thePerfect Cup of CoffeeFeatures and BenefitsControl PanelProgramming Your CoffeemakerMaking CoffeeCleaning and MaintenanceWarrantyMAKING COFFEEBefore you make the fi rst pot of coffee in your new Cuisinart® Brew Central®Coffeemaker, we recommend operating the coffeemaker once using only water and a paper fi lter. This will remove any dust or residues that remain in the system from the manufacturing process.Insert the Water Filter a. Remove the fi lter from polybag and soak in cold tap water for 15 minutes. b. Remove the water fi lter holder from the coffeemaker by lifting it out of the reservoir area with your thumb and forefi nger. c. Grasp stem in one hand. Using thumb of other hand, gently press down and pull toward you. Compartment will fi lp open. d. Place the fi lter in the holder and close the water fi lter holder; you will hear a snap indicating it is in place.NOTE: Caution must be used when inserting the charcoal fi lter. Improper placement in the holder can cause tearing of the fi lter skin. e. Hold the fi lter under cold running tap water for 10 seconds to fi ush. You should place the hole openings in the side of the unit directly under the water stream. f. Allow the fi lter to drain completely. g. Replace the water fi lter holder in the reservoir area of the coffeemaker, pushing it all the way down to the base of the unit, along the reservoir wall.NOTE: We recommend changing the water fi lter every 60 days or 60 uses, more often if you have hard water.Replacement water fi lters can be purchased in stores or by calling customer service or through the Cuisinart web site.Fill the water reservoirWhen fi lling the coffeemaker with water, refer to the carafe height markings and fi ll to the desired number of cups. Be sure to add a small amount of extra water to account for the amount of water lost in wetNewest Added: SS-15BK5 DLC-2011CHBY CDF-100 DFP-14BCWNY CSB-175Tags: Cuisinart Die 7, Cuisinart 11cup Food Processor, Cuisinart 11, Cuisinart DLC 7 Pro, Cuisinart Grind And Brew Coffee Maker, Cuisinart 11 Cup Food Processor Manual, Cuisinart Custom 14 Cups [Carlo's Lines/flickr] Adding two 1/3 cups gives you 2/3 cups. In decimals, 1/3 of a cup is .33 cups, so .33 cups plus .33 cups equals .66 cups. The United States customary cup holds 8 fluid ounces. Since 1/3 or .33 of 8 ounces is 2.64 ounces, 2/3 U.S. fluid cups or 1/3 U.S. cups plus 1/3 U.S. cups is equivalent to 5.28 U.S. fluid ounces. The British imperial cup holds 10 imperial ounces. This means that 1/3 or .33 of 10 ounces is 3.3 ounces. Thus, 1/3 imperial cups plus 1/3 imperial cups is 6.6 ounces.What Are Fractions? Fractions are defined as a part of a whole, written with a top number called a numerator, and a bottom number is called the denominator. A division line called a vinculum separates the numerator and denominator in fractions. Fractions are often presented with a numerator of a lower number than the denominator. However, there are fractions with numerators that are greater than their denominators. Such fractions are called “improper fractions.” Improper fractions may be converted into mixed fractions, which is a whole number accompanied by a fraction, such as in 1 1/2. Adding Fractions Adding fractions is easy. With fractions that have an identical denominators such as in 1/3 + 1/3, add the numerators and retain the denominator. Thus 1/3 + 1/3 = 2/3. In fractions that don't have an identical denominator, such as in 1/2 + 1/3, multiply the numerators with the denominators of the other fraction, and then add the results which will be your new numerator. Since multiplying 1×2 gives you 2 and 1×3 gives you 3, adding 2+3 will give you 5, which becomes your new numerator. Next, multiply the denominators of the two fractions, and the result will be your new denominator. Thus, 1/2 + 1/3 equals 5/6. Converting Fractions to Decimals Fractions resemble division formulas because they represent division. In other words, 1/3 means 1÷3, which gives you 0.33. 1/3 cups, therefore, is equivalent to .33 cups and 0.33 cups plus .33 cups equals .66 cups. Cups in U.S. Customary and British Imperial Systems Both the U.S. customary and British imperial system units of measurements are based on the old English system. While the units measurements for length, weight, distance, and area are identical in both the U.S. customary and imperial systems, their units for volume such as fluid ounces, cups, pints, quarts, and gallons differ. Using the metric system for volume as reference, a U.S. fluid ounce is equivalent to 29.573 milliliters (mL). Since a U.S. fluid cup holds 8 fluid ounces, one U.S. cup holds 236.48 mL — 1/3 or .33 of which is 78.04 mL. This makes 2/3 of a cup equivalent to 156.07. The imperial fluid ounce holds 28.413 ml. Since 1 imperial cup holds 10 imperial fluid ounce, 1 imperial cup is equivalent to 284.13 mL. Using the same calculations as above, 1/3 of an imperial cup is 93.76 mL, and 2/3 of an imperial cup is equivalent to 187.52 mL. The Metric System Cup Although seldom used, the metric system also has its own version of the cup. One metric system cup measures 250 mL. One-third of a metric system cup is 82.5 mL. Therefore, 1/3 metric system cup plus 1/3 metric system cup equals 2/3 metric system cups, which is 165 mL. MORE FROM REFERENCE.COM Photo Courtesy: Pixabay Many coffee drinkers agree that coffee beans ground right before brewing bring out the fresh flavor in a morning cup of coffee. You don't have to be a barista to get this kind of freshness either. With the right coffee grinder, you can make your own at a fraction of the cost of a purchase from the corner coffee shop. There are hundreds of different coffee grinders on the market, but these top models stand out from the rest. Check out why coffee drinkers from all over love these models. MORE FROM CONSUMERSEARCH.COM Cleaning Your Coffeemaker: Filter basket, carafe and lid. Turn unit off and remove plug from outlet. Wash filter basket, carafe and lid in warm, soapy water and rinse thoroughly, or clean in upper rack of dishwasher. Dry after use. Wipe area under the filter basket with a damp cloth. NOTE: DO NOT puT aNy waTEr iN ThE uNiT ONcE fiLTER basket is rEmOvED. To clean base, wipe with damp cloth. Do not use any scouring agents or harsh cleaners on any parts of the coffeemaker. Never immerse base of unit in water. Decalcification: A flashing Clean light indicates unit needs to be decalcified. Fill the water reservoir to capacity with 1/3 cup of white vinegar and 2/3 cup of water. Press the Clean button; when light comes on, turn Coffeemaker on. Five beeps sound when Clean cycle is complete; unit will shut off. Turn unit back on and if Clean light flashes, repeat process; if not, run a brew cycle with water only. Unit is then ready to use Cleaning Your Hot Water System: We recommend you decalcify your hot water system twice a year. Dispense any water in your reservoir until the Add Water light flashes. Add 32 ounces of white vinegar. Dispense 16 ounces of vinegar and discard; this will fill the inner tank. Let unit sit for 20 minutes, then turn to Off and allow hot vinegar to cool. Drain internal reservoir over sink by removing water release tab on bottom of unit. When vinegar has completely drained, replace tab. Refill reservoir with water and drain water as directed above. Unit is now ready to use. Cuisinart DCC-1200BKS Brew Central™ 12 Cup Programmable Coffeemaker - Use Manual - Use Guide PDF. Documents: Go to download!
